

Advanced Health Education Center Announces New Clinical Alliance for Mammography Initial Training Program

Advanced Health Education Center Mammography Program has announced a new clinical alliance with one of the largest health systems in southeast Texas. This organization has inpatient and outpatient facilities located throughout the Houston metro and surrounding area. AHEC is diligently working in expanding clinical opportunities for radiologic technologists to meet the federal guidelines for mammography after mandated training will be the first step in providing local continuing education to meet requirements. Just recently, surveys have shown a shortage of mammography technologists who meet federal and state guidelines. This joint effort addresses the clinical training requirements that have been on hold since the pandemic

Jence Cantu, AHEC Senior Vice President says “AHEC is excited about this new partnership! This organization has deep roots and a stellar reputation for quality patient care. We believe this will be an outstanding opportunity and resource for providing the clinical experience to those who are studying mammography and are required to fulfill federal and state supervised conditions. AHEC continues to grow, and this now expands our options for clinical locations in the Houston metro area and the DFW metroplex. It is a very exciting time for us.”
